

New Automation Technology with Beckhoff PLC Control Workshop held at IBU

Apr 08, 2019

IEEE B&H Young professionals together with B&H Futures Foundation and International Burch University have organized the two-day workshop - New Automation Technology with Beckhoff PLC Control, on April 6th and 7th. The workshop brought together the students from all over the country.

Students had a chance to gain new experiences in using state-of-the-art automation technologies, available through the products of one of the most popular automotive technology manufacturers in Europe - Beckhoff from Germany.

Lectures were given by Mr. Marjan Ravšelj from Beckhoff, Slovenia, and Mr. Suad Ibrahimkadic from SICON company, BiH.

The workshop was concluded with the students' project presentations.
